PROFESSIONAL SUMMARY

AI & Data Science engineer with hands-on backend development experience building RESTful APIs and scalable relational database architectures in Java, Python, and SQL. Brings practical exposure to Machine Learning and Data Analytics, including Power BI and statistical analysis, to design reliable, production-ready systems. Strong problem-solver who collaborates effectively across engineering teams to debug, optimize, and ship stable software.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL
AI & ML: Machine Learning, Deep Learning, AI Agents, EfficientNet Pipelines
Data Analytics: Power BI, Data Visualization, Statistical Analysis, Data Cleaning, IBM SPSS
Backend: REST APIs, Django
Database: PostgreSQL, MySQL, Supabase
Developer Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Backend Developer Intern — BLP Industry.Ai **July 2026 – Present**

- Engineered backend microservices and RESTful API endpoints powering industrial AI solutions and data-driven platforms.
- Developed and integrated Django-based backend services, implementing REST APIs and server-side application logic.
- Architected and optimized relational database schemas and queries, improving data management efficiency and supporting scalable service integrations.
- Collaborated with cross-functional teams to integrate backend workflows, debug server-side logic, and maintain application stability across releases.

PROJECTS

SkillMatch — Full-Stack Job Matching Platform *Django, PostgreSQL, REST APIs*

- Architected a full-stack job-matching platform to resolve fragmented employer-candidate connections, unifying postings, applications, and messaging in one system.
- Engineered the backend with Django, exposing RESTful APIs for authentication, job management, employer workflows, and messaging modules.
- Designed a normalized relational database schema in Supabase (PostgreSQL), modeling employers, job postings, applications, and messaging with referential integrity.
- Implemented secure token-based authentication and structured application-state workflows to manage the candidate application lifecycle.
- Built environment-isolated configurations to support scalable and maintainable deployment.

GitHub: github.com/karthikreddy06/SkillMatch-V3

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Oracle Certified Professional: Java SE 17 Developer
- Python for Data Science and Machine Learning Essential Training (Parts 1 & 2), LinkedIn Learning

NOTABLE ACHIEVEMENTS

- Orchestrated cross-functional logistics as a member of the College Fest Organizing Team (2024), coordinating operational workflows and team execution for high-attendance campus events.

EDUCATION

B.Tech, Computer Science (AI & Data Science) **2022 – 2026**
Saveetha School Of Engineering, Chennai *CGPA: 8.27*
